

SiteWorks joins or sends crews as subject matter experts, supervisors, contractors, subcontractors and inspectors. We are experienced in all plant sizes. Which means, we have the right knowledge and specific equipment for your project. For lagoons and floating lateral systems, we use SiteWorks owned custom boats for work that must be completed without draining the basin. Our crews often operate skid steers, reach trucks, and RTOs to complete projects. SiteWorks offers Installation Warranties and Preventatives Maintenance plans for every system.

Factory-Authorized Installation Warranties

GENERAL PERFORMANCE INSPECTION

Qualified SiteWorks personnel inspect the installation and ensure adherence to factory specification prior to startup. Once confirmed, we warrant the start-up performance.

SUPERVISED INSTALLATION

When an installation is completed under the direct supervision of SiteWorks, the system is certified that it will perform to the specifications provided by SiteWorks in their design.

CONTRACTOR INSTALLED, SITEWORKS TESTED

A complete and thorough inspection of a contractor-installed system that is considered ready to start up. Any items determined to not be correctly installed are brought to the attention of the operators for their fix, or by SiteWorks contract.

SITEWORKS INSTALLED

SiteWorks Installations are warranted for an extended two-year period for product defects as well as other factors. (Contact SiteWorks for details.)

Preventative Maintenance

Membrane Replacement Service Program: OEM replacement membranes for most major brands. Services can be scheduled as-needed basis or by regular interval.

PREVENTATIVE MAINTENANCE PLAN

Facility operators outsource regularly scheduled aeration system maintenance to SiteWorks Specialists. For new systems, the mechanical warranty is extended to the life of the service agreement.

THE INFINITY PROGRAM™

The Infinity program includes diffuser unit maintenance with preventative procedures and periodic membrane performance measurement and analysis over the life of the contract.

ACID CLEANING

Cleaning your diffusers should be part of your yearly scheduled maintenance program. SiteWorks can evaluate and provide timely, cost-effective, safe and professional acid cleaning of your system with no downtime that could reduce energy cost by over 25%.

CERTIFIED

FOR YOUR SAFETY AND OURS.

- OSHA 10
